

# TESTIMONIALS

"I've bought my last 4 vehicles from Jim Dollinger and so have some of my friends. He quickly finds the vehicle you are looking for and even delivers it to you. I was so impressed with his service that I hired him to sell a house. His long hours and hard work got us to a deal that we wanted. I highly recommend him."

Doug Lougheed

"Just received my 6th vehicle from Jim Dollinger and his team. Jim thinks ahead with the current situation of supply chain issues, and reaches out well in advance to make you aware that pre ordering will get you the exact vehicle that you want. Not only will he get you the vehicle you want, he will also help you sell your current vehicle. I've recommended Jim to several of my friends that are also repeated buyers. Best of all the vehicles are delivered to your doorstep. Any make - any model!"

## VEHICLE CORNER

All about **Air Filters!**

An air filter is designed to trap dirt and debris before it gets to the engine. When the air filter is dirty because of all the accumulated debris, it becomes harder for the engine to function and will result in decreased performance.

Air filters should be changed every **15,000 to 30,000 miles**.

Symptoms of an air filter that is in need of cleaning include:

- Tailpipe smoke is visible.
- Poor Performing Engine.
- Strange noises.
- Check engine light comes on.
- Poor acceleration
- Poor gas mileage.

## HISTORY CORNER

The Dollinger House in Redwood, NY (Left) was built in 1836 by my Great, Great, Great Grandfather, Pomeratus Dollinger (1776 - 1849). The hotel was a favorite stopping place during stagecoach days, and in the Civil War Era. It was razed in 1942.

The Dollinger (Right) - Innsbruck Austria, Family Owned & Operated continuously since the 1600's.
